Snehal Vishnu Shinde

+1-617-908-0245 | shinde.sne@northeastern.edu | linkedin.com/in/snehal-s-578705172 | Boston, MA

Summary

Software Engineer with 4+ years building full-stack applications and cloud/DevOps infrastructure on Java Spring Boot, Angular/TypeScript, Kubernetes, and AWS/GCP. Cut release cycles by 87% and sustained 99.9% uptime for 2M+ daily banking transactions. Google Cloud ACE and Azure AZ-104 certified.

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL, Python, Bash/Shell
Backend & Microservices: Spring Boot, Node.js, Express, RESTful APIs, Microservices Architecture
Databases & Caching: PostgreSQL, Oracle, MongoDB, Redis, Kafka, pgvector
Cloud & DevOps: AWS (EC2, EKS, S3, RDS, Lambda, IAM, KMS, CloudWatch), GCP (GKE, Cloud SQL), Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions, ArgoCD
Monitoring & Security: Prometheus, Grafana, ELK Stack, Trivy, SonarQube, OPA Gatekeeper
Certifications: Google Cloud ACE, Microsoft Azure AZ-900, Microsoft Azure AZ-104

Experience

Superstars Inc **Jan 2026 - May 2026**
Software Developer Intern | Angular, TypeScript, HTML, CSS, Node.js, REST APIs *Boston, MA*

- Developed 25+ reusable UI components and a predictive video preloading mechanism in Angular/TypeScript, reducing streaming buffer delays by 20% and bandwidth usage by 35%.
- Integrated 10+ RESTful API endpoints using RxJS observables, establishing modular request caching and error-handling routines in an Agile team.
- Optimized frontend load times by 40% via route-level lazy loading and progressive image rendering.

Tata Consultancy Services **Apr 2021 - Jul 2024**
Systems Engineer | Java, Spring Boot, GCP, Kubernetes, Docker, Jenkins, PostgreSQL *Mumbai, India*

- Engineered CI/CD pipelines with Jenkins and Docker on GCP, cutting release cycle time by 87% (45 to under 6 minutes) and enabling zero-downtime automated deployments.
- Designed and operated 10+ Java/Spring Boot microservices on GKE for a core banking platform, cutting API latency by 40% and sustaining 99.9% uptime across 2M+ daily transactions.
- Optimized PostgreSQL/Oracle query plans and indexes, cutting execution time 65% and compute costs.
- Resolved 95% of Java/Linux production incidents within SLA via log analysis and root-cause investigation.
- Automated a manual encryption/decryption process in Java/Spring Boot, saving roughly 4,800 hours annually.
- Reached 85% code coverage using JUnit/Mockito TDD within 2-week Agile sprints, reducing regression bugs.

LinuxWorld Informatics Pvt Ltd **May 2020 - Aug 2020**
Associate Cloud Intern | AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins *Remote*

- Converted manual AWS provisioning (EC2, VPC, S3, IAM) into reusable Terraform modules, cutting deployment time by 50% and setup effort by 70%.
- Automated configuration management and application deployments across environments using Ansible playbooks.
- Configured Kubernetes clusters for 15+ containerized apps with rolling updates and liveness probes; built Jenkins/GitHub Actions CI/CD pipelines with automated rollback on failure.

Projects

AI Document Q&A Platform | *React, TypeScript, Java, Spring Boot, Python, pgvector, AWS ECS*

- Engineered a full-stack RAG platform with a React/TypeScript UI and a Java Spring Boot/FastAPI backend.
- Stored pgvector embeddings in PostgreSQL and automated deployment via GitHub Actions CI/CD to AWS ECS.

DevSecOps CI/CD Pipeline | *GitHub Actions, Trivy, SonarQube, Docker, OPA, Kubernetes*

- Integrated Trivy image scanning, SonarQube static analysis, and Snyk checks as required gates in a GitHub Actions pipeline, blocking vulnerable builds before deployment.
- Wrote OPA Gatekeeper policies to automatically reject Kubernetes deployments that fail security baselines.

Event-Driven Microservices Platform | *Angular, Java, Spring Boot, Kafka, Kubernetes, AWS EKS*

- Built an event-driven app: Angular dashboard backed by 3 Kafka-connected Spring Boot microservices.
- Monitored consumer lag and throughput via Prometheus and Grafana dashboards.

Education

Northeastern University - College of Engineering **Sep 2024 - Dec 2026**
Master of Science in Information Systems *Boston, MA*
Relevant Coursework: Programming Structures & Algorithms, Database Design, Application Engineering, Generative AI

University of Mumbai **Aug 2016 – Sep 2020**
Bachelor of Engineering *Mumbai, India*
